Overview

This document provides a complete breakdown of prescription glasses pricing, including:

- Lens types and their available index combinations
- Coating options and pricing
- Base costs (per single lens and per pair)
- Additional fees (tinting, edging)
- Profit margin application
- Final retail pricing

1. Lens Types

Lens Type	Description	Available Indexes
CLEAR	Clear (Mono RX)	1.56, 1.60, 1.67
TINTED	Tinted (Mono RX)	1.56, 1.60, 1.67

POLARIZED_NUPOLAR	Polarized (NuPolar)	1.60, 1.67 (No 1.56)

2. Coating Types

Coating Code	Full Name	Description
UC	Uncoated	Basic uncoated lens
BLUE_PRO	Blue PRO	Blue light protection coating

SERICUM_UV	UV Protection	UV protection coating
------------	---------------	-----------------------

Coating Availability by Lens Type

Lens Type	Allowed Coatings	Notes
CLEAR	UC, BLUE_PRO	SERICUM_UV is NOT available - Pricing exists in data but option is hidden by business logic
TINTED	SERICUM_UV, BLUE_PRO	UC coating not available
PHOTOCHROMIC_SOLIS	SERICUM_UV, BLUE_PRO	UC coating not available
POLARIZED_NUPOLAR	SERICUM_UV, BLUE_PRO	UC coating not available

 IMPORTANT NOTE FOR CLEAR LENSES:

- SERICUM_UV pricing exists in the source data (€14.49, €22.98, €31.07 per single lens).
- However, SERICUM_UV is **NOT selectable** for CLEAR lenses in the prescription flow.
- This is enforced by the getAllowedCoatings() function which filters out SERICUM_UV for CLEAR lens type.
- Only UC and BLUE_PRO coatings are available for CLEAR lenses in the UI.

6. Profit Margin

Fixed Profit: €15.00 per lens pair order.

The profit is added to the base cost (lens pair + tint fee + edging fee) to calculate the final retail price.

7. Pricing Formula

Base Cost Calculation

Base Cost = (Lens Price Per Single × 2) + Tint Fee (if applicable) + Edging Fee

Final Retail Price Calculation

Final Retail Price = Base Cost + Fixed Profit (€15.00)
